

Amendments to the Abstract:

Please replace the original Abstract with the following amended Abstract:

A tub protection bolt for a washing machine is disclosed for fixing a tub to a cabinet for the washing machine. The tub protection bolt includes a screwed shaft configured to penetrate a cabinet of the washing machine to be coupled with a boss of a tub and a head part at one end of the screwed shaft having a narrow cut-away portion configured to hold a power cable of the washing machine. The head part includes a head at the one end of the screwed shaft, a flange extending outward from an outer circumference of the head, and the narrow cut-away portion provided from an outer circumference of the flange toward the head. The cut-away portion includes an insertion portion provided from the outer circumference of the flange in a direction of a center of the head and a fixing portion bent from an end of the insertion portion.
